Introduction

Concise summary of your business in bullets.

Problem Statement

Briefly explain the problem your business is trying to address.

Proposed Solution

Briefly explain the solution proposed by you.

Product/Service

Introduce the product/service along with the features.

Traction

Current status of your business and how to scale it up?

Target Market

Who are your customers?

Size of market

TAM: Total available market

SAM: Serviceable available market

SOM: Serviceable Obtainable Market

(Give app. figures)

Competitors & How to tackle them

- Direct competitors
- Indirect competitors
- Ways of tackling competition

Revenue Model

- Explain various ways in which your project aims to make money.
- Kindly mention numbers for thorough understanding
- Use statistics/ graphs to justify your claims

Unique Selling Proposition

Mention what makes your product and marketing strategy unique than the services/products already existing .

(you can achieve this by doing a competitive analysis on your competitors)

Funding

- Total income and expenditure.
- Explain how are you going raise funds to cover expenses.

Conclusion

Summarize your business plan with your key points, provide future scope, etc.

❏ Neural ERP · Pragati 2026 · St. Francis Institute of Technology

Introduction

The Complete Operating System for Modern Indian Colleges

Neural ERP replaces old college systems with one unified AI-powered platform (attendance to career placement).

14

Integrated Modules

₹80-100K

Total Funding Needed

12 Months

To Profitability

What We Built

1. Smart Board Integration
2. AI-Driven Personalization
3. Predictive Analytics Dashboard
4. Career Intelligence Engine
5. Automated Teaching Assistant
6. Military-Grade Security

Why It Works

- Serves: Students · Faculty · Parents · Admins · Alumni
- Market: TAM ₹5,000–7,000 Cr | 3,000+ colleges
- Revenue: Licensing, Freemium, B2B, Placement Fees, Consulting
- Goal: ₹16 Cr revenue by Year 5

Neural ERP · Pragati 2026 · St. Francis Institute of Technology

Problem Statement

Indian colleges are running on broken infrastructure

 The average Indian college runs 5–15 disconnected software systems

Fragmented Systems

5–15 disconnected tools causing data silos

Zero Career Support

No internship or career readiness tools

Inefficient Teaching

No syllabus tracking or teaching insights

Manual Admin Burden

Hours wasted on reports and data entry

Reactive Management

No dropout prediction or early warnings

Poor Parent Engagement

No real-time visibility for parents

Security Vulnerabilities

Sensitive data with basic password protection

Lost Learning Content

Board work vanishes after every class

 Neural ERP · Pragati 2026 · St. Francis Institute of Technology

Proposed Solution

One Platform. Every Problem. Solved.

Neural ERP integrates every aspect of college management into one secure intelligent system.

1. Smart Board Integration

Auto-captures classroom content using OCR technology

2. AI-Driven Personalization

ML algorithms for personalised student recommendations

3. Predictive Analytics Dashboard

Predicts dropout risk, exam scores, placement chances

4. Career Intelligence Engine

AI matches students with global internships and jobs

5. Automated Teaching Assistant

Tracks syllabus, generates session summaries

6. Military-Grade Security

3FA, AES-256 encryption, blockchain certificates

Neural ERP · Pragati 2026 · St. Francis Institute of Technology

Product / Service

14 Modules. One Platform. Every Stakeholder Covered.

ACADEMIC CORE	INTELLIGENCE LAYER	STAKEHOLDER PORTALS
Attendance Management	Predictive Analytics Dashboard	Student Dashboard
Timetable Management	Career Intelligence Engine	Faculty Dashboard
Assignment & Exam Module	AI Chatbot Assistant	Parent Portal
Syllabus Tracker	Gamification Module	Admin Dashboard
Library Management		

 Neural ERP · Pragati 2026 · St. Francis Institute of Technology

Traction

Pre-Revenue. Fully Validated. Launch-Ready.

Current Status

- ✓ Business plan submitted to Pragati 2026
- ✓ Technical architecture designed
- ✓ UI/UX wireframes complete
- ✓ Market research done — 3,000+ colleges identified
- ✓ Zero external funding spent so far

Growth Timeline

Month 6	MVP launch + free college pilots
Month 10	First paying customer — ₹1.5L
Month 18	5 customers — ₹7.5L ARR
Month 27	Breakeven — ₹54L revenue, 35% margin
Month 42	₹3.75 Cr revenue, 73% margin

📄 Neural ERP · Pragati 2026 · St. Francis Institute of Technology

Target Market

Institutions Under Pressure to Perform — We Solve Their Pain

Engineering Colleges

3,000+ institutions across India

Management Institutes

IIMs, B-Schools, 500+ institutes

Science, Arts & Commerce

State university affiliated colleges

Technical Training Institutes

Polytechnics and skill centres

Principals, Deans and TPO Heads are judged on placement rates and NAAC scores. They need proven ROI — we deliver it.

Secondary Target

- Schools K-12 · International Universities · Corporate Training

6-Step Approach

1. Target Tier 2 and 3 colleges first
2. Offer 3-month free pilots
3. Word of mouth through college networks
4. Attend EdTech and NAAC conferences
5. Digital marketing to decision-makers
6. Partner with college associations

Neural ERP · Pragati 2026 · St. Francis Institute of Technology

Size of Market

A ₹7,000 Crore Opportunity. We're Starting at the Core.

📄 India EdTech Market — \$3.5B (2025) growing to \$10B (2030) at 23% CAGR

TAM	SAM	SOM
₹5,000–7,000 Cr	₹500–1,000 Cr	₹15–25 Cr
Full India EdTech ERP segment	5,000 engineering & management colleges	200 paying institutions in 5 years

NEP 2020

Mandates digital transformation

NAAC / NBA

Requires data-driven documentation

Post-COVID

Institutions seek digital solutions

Large Student Base

93 million higher education students in India

Competitors and How We

Win Fragmented Solutions vs. One Complete Platform

Direct Competitors

- Fedena — Basic ERP, no AI, no career module
- MyClassCampus — Attendance only, no analytics
- Campus 365 — Fragmented, no intelligence
- Internshala / Unstop — Career only, no academics

Indirect Competitors

- Microsoft Teams for Education — Collaboration only
- Google Classroom — Assignments only

Feature	Competitors	Neural ERP
AI Analytics	No	Yes
Smart Board	No	Yes
Career Module	No	Yes
3FA Security	No	Yes
All-in-One	No	Yes
Predictive Engine	No	Yes

1. Unique Combination

Smart Board + AI Career + 3FA Security

2. AI-First

Predicts outcomes; competitors only report history

3. Cost Advantage

50–70% lower cost; founders build product

Revenue Model

5 Streams. Recurring. Scalable. Profitable in 27 Months.

Stream	Revenue Share	Details
Institutional Licensing	60–70%	₹1.5L to ₹60L per year based on college size
Career Module Freemium	20–25%	₹499/month or ₹4,999/year per student
B2B Partnerships	8–12%	₹10,000/month recruiter listings
Placement Success Fees	5–8%	12% commission on first month salary
Consulting & Training	2–4%	Custom integration and training programs

Pricing Tiers

Small College <2,000 students	₹1.5 Lakh / year
Medium 2,000–5,000	₹3 Lakh / year
Large 5,000–10,000	₹6 Lakh / year
University >10,000	₹60 Lakh / year

Financial Milestones

1. Month 10 → ₹1.5L ARR — 1 customer
2. Month 18 → ₹7.5L ARR — 5 customers
3. Month 27 → ₹54L revenue — Breakeven (35% margin)
4. Month 42 → ₹3.75 Cr revenue — 73% margin
5. Year 4–5 → ₹16 Cr revenue — 70% margin

Unique Selling

The Only ERP That Takes Students From Enrollment to Employment

From Enrollment to Employment — in One Platform

The only ERP that directly improves placement rates through AI career matching while managing all academic operations

1

Complete Operating System

Academics + Career + Analytics + Security. All in one place. Nothing fragmented.

2

Proven Impact

15–20% higher placement rates.
70% reduction in admin workload.

3

Smart Board

Only platform in India capturing live classroom content via OCR.

4

Predictive AI

Forecasts dropout risk and placement chances before they happen. Competitors only report history.

5

Bootstrap Proven

Profitable in 27 months with only ₹12L external funding.

6

Bank-Level Security

SFA, AFS, 356 + Blockchain certificates. Not just passwords like competitors.

7

Built to Scale

100 to 100,000 students. Zero performance degradation.

Neural ERP wins on AI depth · Feature breadth · Security level · Cost efficiency — vs Fedena, Campus 365, MyClassCampus

Neural ERP · Pragati 2026 · St. Francis Institute of Technology

Funding

₹12 Lakhs. Total. That's All We Need.

Conclusion

Neural ERP is not just a software system — it is a paradigm shift in higher education

Transforming every Indian college from an isolated knowledge centre into a connected career launchpad

Where every student gets personalised guidance, global opportunities and the tools to succeed

70%

Admin tasks automated

15–20%

Higher placement rates
